5. What is the residential area called?

Southlands	Docklands	Eastlands
------------	-----------	-----------

C. Please read the following statement and then answer questions 1 to 5 by circling the correct answer(s):

Anthony & Owen are traveling around Europe on a driving holiday, for the first leg of their journey they are planning to go from Paris to Madrid (distance of 1300kms), then from Madrid to Barcelona (620kms) & then from Barcelona to Milan (980kms). They calculate that they will travel at an average of 100 km per hour & plan on stopping overnight between Paris & Madrid.

1. What is the total distance that Anthony & Owen will be traveling on this leg of their journey?

2800kms	2900kms	3000kms
---------	---------	---------

2. If Anthony & Owen stop exactly halfway between Paris & Madrid how many kms will they travel each day?

650kms	65kms	700kms
--------	-------	--------

3. If Anthony & Owen managed to do the Madrid to Barcelona leg in 5 hours what would be their average traveling speed?

124kmph	1240kmph	12.4kmph
---------	----------	----------

4. If Anthony & Owen decide to do the bulk of the Paris to Madrid journey on the first day and managed to travel 950kms before they stopped how many kms would they need to travel on the second day to reach Madrid?

45kms	650kms	350kms
-------	--------	--------

5. Anthony is planning to drive the 1st 600kms of the Barcelona to Milan journey. How many kms would that leave Owen to drive?

98kms	980kms	380kms
-------	--------	--------
